Art Unit: 1616

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 27 has been renumbered 75.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3-9, 11-23, 26 and 75 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The rejections of record are maintained; "long chain" is exemplified, not defined, as applied in claim language wherever it appears (now, at line 67 claim 1, for instance). The rejection of R is maintained, Hawley not withstanding. Applicants must properly define all terms in a claimed structure-R is not an atom but rather a symbol needed to be defined. Look again at Hawly, there is no H.

27 is incomprehensible-there is no antecedent basis for agents consisting of any component (see rejection of record relating to any component-still maintained it appears in this new claim 75) as the composition is to spinosan derivatives with undefined R. The claim requires any component, or any 2 or more components, just as they are produced by Sispinosa-we do not know whether or not consisting of comprising the

Art Unit: 1616

structure of claim 1, or whether the structure includes components, as, perhaps defined as R, but not so stated-we can not interpret the meets and bounds of this claim. Please spell out PEG (claim 1).

Claims 1-9, 12-23, 75 are rejected under 35 U.S.C. 102(e) as being anticipated by Snyder-6063771.

The rejection of record is maintained-claim 1 now invokes rejected claim 2, 10 subject matter Snyder applies his compositions to kill Lice in water (col.4, I). Claim 75 has a S. spinosa component, spinosyn.

Claims 1-7, 9, 12-16, 22 and 75 are rejected under 35 U.S.C. 102(e) as being anticipated by Kassebaum-WO 01/12156.

The rejection of record is maintained; claims re-written previously rejected, White 75 is also met, (also 4, lines 15-20).

Applicant's arguments filed 5/22/03 have been fully considered but they are not persuasive. Applicants arguments have been addressed above-they are not convincing in regard to 112 and art rejections maintained, but absent the "component" issue, the enablement rejection of 1-23 is withdrawn-we do not instill it on 75, as 75 is not comprehensible. The art rejection are maintained for reasons of record, but we have no ready response to applicant's arguments to the rejection of claim 26 over the art, but we can not find it in the instant specification, either.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP

Application/Control Number: 09/841,715

Art Unit: 1616

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neil Levy whose telephone number is 308-2412. The examiner can normally be reached on Tuesday- Friday 7:00 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 308-2927. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-1235.
